# Pathologies and Applications

---

Let's use the nature! It can bring us a lot...

---

## Wounds

---

Scratches, grazes, bruises, girth galls, saddle sores, stings, superficial wounds. The Warendorf Balm prevents tissue swelling and relieves pain. It also prevents the development of any inflammation in the area. The oils promote natural tissue regeneration either at the cutaneous level, but also at the level of hair regrowth

-> **Application** : Disinfect the wound and apply the Warendorf Balm 2 times a day.

---

## Cracks

---

The Warendorf Balm contains astringent, reclaiming, antibacterial and antifungal oils. The Warendorf Balm is recommended for daily care of the pastern.

-> **Application** : Disinfect the wound and apply the Warendorf Balm 2 times a day.

---

## Sarcoid

---

The origin of this tumor is viral just as by humans. We discover that in 95% of the treated cases, the daily application of the Warendorf Balm on sarcoids gives very good results.

-> **Application** : Disinfect the wound and apply the Warendorf Balm 2 times a day. The Warendorf Balm can also be applied directly upon occurrence of swelling under the skin which in most of the cases prevent the development of the sarcoid.

---

## The summer dermatitis/ Sweet itch

---

This is an allergic reaction caused by the saliva of a female mosquito. She needs blood to for her eggs to reach maturity. These bites on your horse can cause an allergic reaction.

-> **Application** : Disinfect the wound and apply the Warendorf Balm 2 times a day. The Warendorf Balm can also be applied directly upon the occurrence and possibly preventively.

---

## Hooves

---

The Warendorf Balm is recommended for care of the horn. It feeds the horse's hoof in depth. Prevents Abscess. Restores strength flexibility of the horn and sole.

-> **Application** : Massage the coronet regularly, it helps to make the regrowth more flexible and elastic of the horn
